Dev4U — crafting the bit

Activity Report | until **2023**

ABOUT US

DEV4U SRLS (Italy), is an innovative **IT and consultancy company** with its roots in *international development cooperation*. We know and understand the needs of this sector. We develop web-based solutions which carefully adapt to your requirements – not the other way around.

Our quest is to simplify teamwork by using web-based software. We want to make sure that people in the development sector can count on tools that facilitate their work.

However, we don't work exclusively for the development sector: every private and public company working with data, of any type, and with the need to get reliable information out of its data, can greatly benefit from our expertise.

With our tailor-made software solutions, our clients can easily and efficiently organize a wide variety of processes: from impact and results monitoring system to project management information systems; from surveys data entry to knowledge management; from simple data entry to data exchange across different systems.

Our **module-based approach** provides you with the functions you need for your project, organization, or network. In addition to the specific tools and procedures we offer for the data management, we supply the team with several different solutions for online collaboration (e.g. **for file sharing, video conferences, shared agenda, etc**).

In the years, we have acquired a strong expertise in:
- **Food Consumption and nutrient intake analysis;**
- **Climate Monitoring, Reporting and Verification (MRV) systems;**
- **Monitoring and Evaluation Systems;**
- **Management Information System;**
- **E-learning platform;**
- **Online Document Repository;**
- **E-commerce website.**

Indeed, our Company's primary asset is the experience accumulated through many years of multi-disciplinary and cross-cultural work, design, web project management and monitoring and evaluation of international and national projects, for and with international donor agencies, international firms and national companies, private and public, in low-, middle-, and high-income countries.

WHO WE ARE
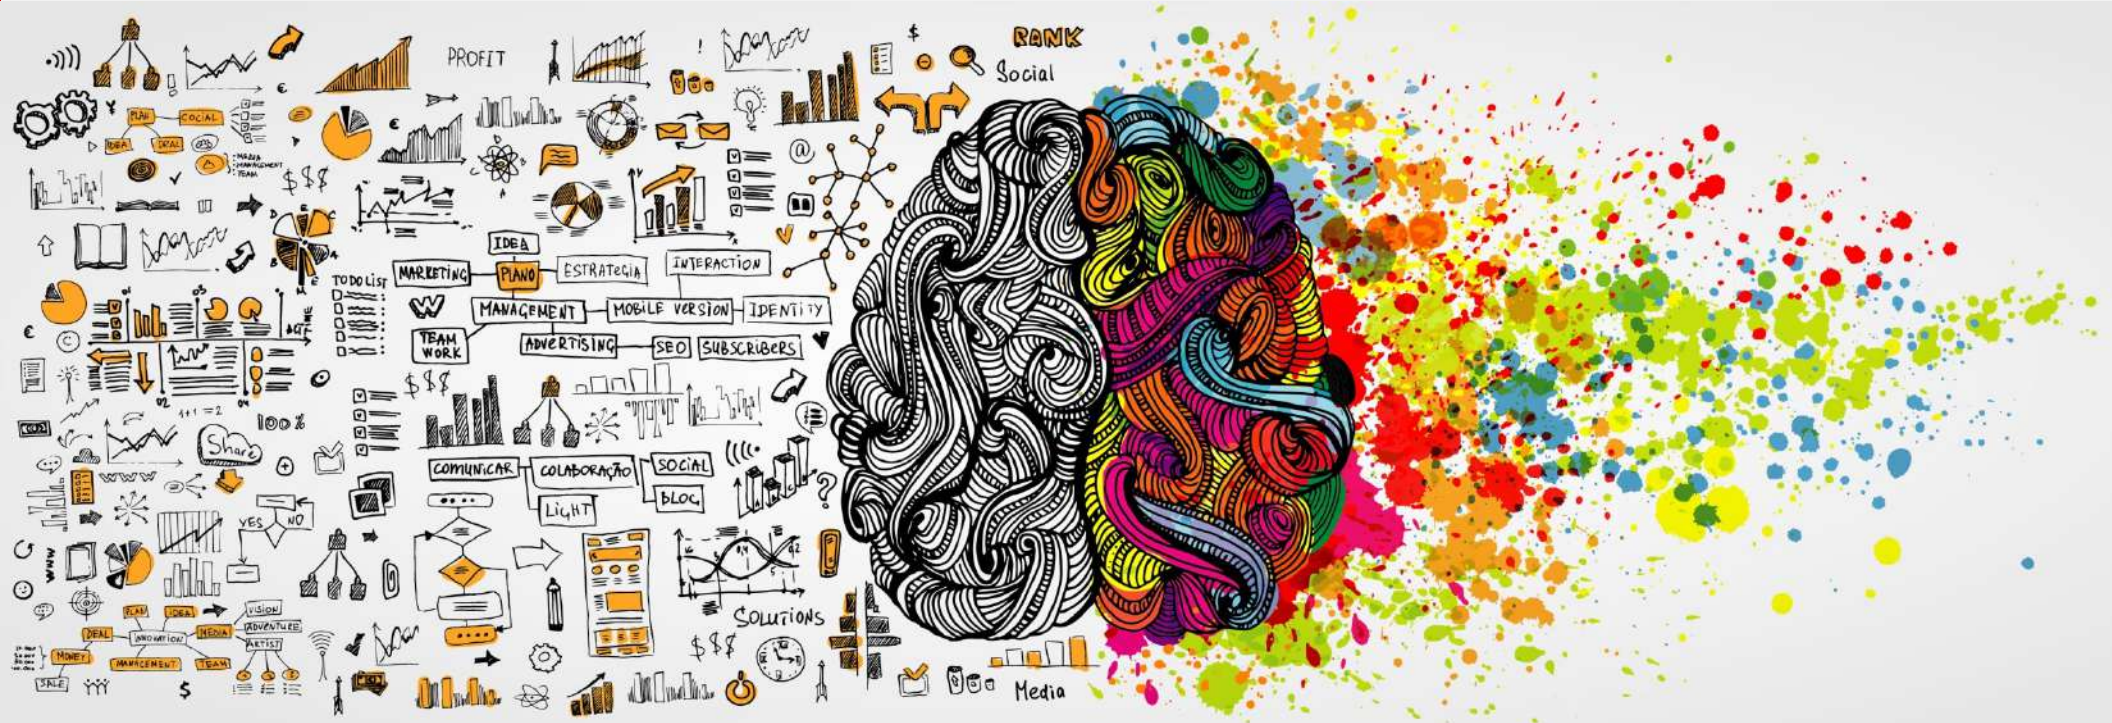

From **Software Development**
to the **Mobile Apps**

from **Web Design**
to **Digital Marketing**

all with one
Development Agency

Why a development agency?

A *modern* **web project** is made up of different elements such as **creativity**, **strategy** and **business** that require very *specific skills*.

WHERE DO WE COME FROM

DEV4U was born in **2015**,
but inherits the DNA of **4 companies**, each focused on
individual aspects that today are *only a part* of the
whole world of DEV4U.

RUNSYS (2011)

Details

Description

Details

Status	CLOSED
Reference	SMP-FOOD-2022-F2F-FWStakeholders
Publication date	23 June 2022
Opening date	23 June 2022
Deadline model	Single-stage
Deadline date	20 September 2022, 17:00 (CEST)
Programme Sector	Food
Programme	Single Market Programme Food Chain
Tags	Food safety · Proposals

Description

The aim of the call is to support stakeholders in the **hospitality and food services' sector** to improve measurement of food waste and help implement food waste prevention in their operations and organisations. The sector **includes restaurants, hotels and catering services (healthcare, education, canteens, transportation etc.), in both the public and private sphere.**

Through this call, the European Commission is looking for solutions that are ready to be implemented by **small and medium-sized enterprises** (SMEs), in close-to-market conditions and at industrial or commercial scale. A wide range of activities are eligible to be supported by the grants offered under this call for proposals, such as integration of food waste prevention in business operations, food waste monitoring programmes, communication materials, development of new business models, training programmes etc.Project proposals should include an **initial food waste diagnosis** to understand the extent of the issue and should **integrate food waste measurement** as part of the assessment of the effectiveness of the initiatives proposed.

Budget: €2,250,000

| **AESA** – WEB REPOSITORY OF METHODOLOGIES

AESA (Agriconsulting Europe S.A.) is a consulting company operating in the field of International Cooperation.

Normally, to participate in *tenders and calls for proposals*, they have to write and present **Methodologies** that describe how they intend to manage a particular project, what objectives they aim to achieve, what benefits they expect, etc. Over the years, AESA has accumulated a large number of **Methodologies**, which can often be "**reused**" for writing other documents.

AESA has commissioned **DEV4U** to develop a **Web Platform that allows for archiving, indexing, and searching within Methodology documents**. The search engine is a full-text search and performs keyword searches as well.

| **ARAA CALL FOR PROPOSALS** -
APPEL À PROPOSITIONS

DEV4U has developed a **Web Platform** for ARAA for the **publication of Calls for Proposals** and the **submission of project proposals in response to these Calls for Proposals**. The aim of the initiative is to *finance projects carried out by organisations*.
These organisations must: **demonstrate their ability to implement large-scale social safety net projects, show experience in implementing rural development projects**.
As groups are encouraged, the planned activities and remuneration of each partner organisation must be explicitly stated in the various components of the project.

| PLAN'EAT - DIETARY PATTERNS

PLAN'EAT is a **Horizon Europe Research Project**, bringing together **24 partners** and running **from September 2022 to 2026**.

The *dietary pattern database* is meant **to map European dietary patterns of 9 different target groups from 9 European areas** (the Living Labs) in order to have an instrument to analyze the eating habits in different contexts.

In addition to that, the database includes also the *food consumption of those PLAN'EAT countries that do not have their own Living Lab*, like **Belgium** and **Netherlands**.

The dietary pattern database is built on official data coming from **EFSA** and on specific surveys used for two countries (**Hungary** and **Ireland**) to get data on specific age groups not yet available in **EFSA database**.

Modules: Query Engine, Data References, Admin Tools.

Dev4U *crafting the bit*

| RESULTS AND INDICATORS FOR DEVELOPMENT

DEVCO Unit 04 "*Evaluation and Results*" jointly with DEVCO Thematic Units has developed an **online guidance** for *building strong logical frameworks* – identifying SMART results and measurable indicators – in line with DEVCO priorities for the given sector.

For each sector, the Guidance provides:

- a diagram of the results chain, which reflect EU policy priorities as from key development policy policy documents;
- a short narrative explaining the underlying approach;
- a set of key indicators associated with each expected result from the results chain.

Documental web application

crafting the bit
Dev4U

| **National** Activity

| June **2017**

| ARCHIVIO SEMPLICE

The web application was created with a very specific purpose: **to provide its customers with a "virtual drawer" where they can store their work documents, photos, articles, projects, drawings, recordings, videos** and much more.

Documents loaded into the software can be **classified** into **virtual sets**.

The organization of the **folders** containing the documents is *free* and ***entirely left to the user***.
